

AUTOCHAIR SMART LIFTER

The Smart Lifter is a hoist that enables a mobility device, such as a wheelchair, scooter or powerchair, to be easily and simply lifted into a car boot at the touch of a button. This eliminates the need for the wheelchair/scooter user or family member to struggle with getting the device into a vehicle when wanting to venture further afield.

Within our Smart Lifter range, we have three different hoists that best suit a range of mobility vehicles, from wheelchairs to scooters.

- Easy to use
- Lifts all types of scooters and powerchairs
- Manufactured in the UK
- Over 400 vehicle specific installation kits
- Lifts up to 200kg
- Transfer easily to your next vehicle
